

Nomad provides secure payment processing solutions for merchants wishing to optimise the retail experience of their customers. Our fully integrated POS solutions are flexible and cost-effective.

About us

Nomad Information Systems (PTY) Ltd provides a unique range of payments and Value Added Services (VAS) solutions in South Africa and Africa. Our impressive range of standalone and integrated solutions will enhance the retailer's product offering, whilst being complimentary to its host banks.

Nomad is a registered Systems Operator that processes bank card (i.e Chip based debit and credit cards), including private label cards. Nomad's dynamic, bespoke and customizable solution also offers retail groups and independent merchants a variety of financial products and VAS, such as pre-paid airtime/electricity, gift cards and merchant loyalty programs, which will increase revenue and footfall to their businesses as well as increase brand exposure.

Mission & Vision

Our Mission is to provide our customers with a world-class multi-channel transactional payments and Value Added Services system that is innovative, flexible and scalable, thus allowing us to evolve and grow our business, while making sure to satisfy all stakeholders and maintaining a culture of our customers remaining at the heart of everything that we do.

Our Vision is to continuously evolve as an organization, improving our range of physical and virtual transactional products and customisable solutions that meet our customers' demands. We aspire to provide high quality products and high levels of support that exceed our customers' expectations. Our solutions are implemented and executed in a precise manner, ensuring that our customers reach their business objectives.

Core Values

- To operate with honesty and integrity.
- To co-evolve with all stakeholders.
- To deliver world-class quality products and solutions.
- To work towards our triple bottom line (3BL) of financial, environmental and social targets.

3BL

Nomad is working towards a model of sustainability with respect to our environmental awareness programme. As such, we invite all stakeholders to participate as co-evolutionary partners in these programmes with a view that we endeavour to leave more than what we take. In order to promote our 3BL initiatives, portions of our revenue streams are allocated towards these programmes.

Clients

Nomad Information Systems (Pty) Ltd serves a number of clients in various fields:

- Clothing Stores
- Fast Foods
- Parking Garages
- Hotels
- Hardware Stores
- Travel & Entertainment

EFT Solution

Our Solution

Nomad's integrated solution has been designed to provide an easy-to-use, backwards-compatible abstraction layer for EFT functionality. Masked beneath this layer are the complexities of the various banking interfaces, the implementation of EFT business logic and all idiosyncrasies of magstripe and smartcard (EMV) technologies. Designed with a high-degree of modularity resembling a 'building blocks' approach, Nomad enables and supports various services – such as loyalty, gift cards and pre-paid airtime/electricity, which can be readily added as required. Also highly scalable, these solutions can operate across a wide range of applications, operating systems and businesses including:

- Standalone kiosks
- Single-till corner shops
- Convenience stores with a few tills
- Multi-lane department stores
- Large hyper stores
- Wholesale ("cash 'n carry") environments

Our solutions include:

- Integrated Card Payments
- Stand Alone Card Payments
- VAS Services
- E Commerce
- M Commerce

Our Commitment

The commitment of a Nomad solution is to provide peace of mind, improved operational efficiencies and allow merchants the time to manage their core business environments competitively and profitably.

Our Team

Nomad's team of dedicated, passionate and experienced individuals possess a wealth of technical expertise and are backed by best-of-breed solutions and software.
